Education

B.S. Computer Science - Temple University, Philadelphia, PA **Present – May 2027**
Provost Scholar | **Honors Program** | Cognitive Neuroscience Minor | Linguistics Certificate
Relevant Coursework: UI/UX Design, Data Structures, Computational Probability & Statistics, Program Design and Abstraction
High School Diploma - Thomas Jefferson High School for Science and Technology, Alexandria, VA

Skills

Portfolio:
Design & Research: Figma, FigJam, Miro, Adobe Creative Suite (Premiere Pro, After Effects, Illustrator, Photoshop, InDesign), Canva, User research, semi-structured interviews, usability testing, competitive analysis, thematic analysis, qualitative coding, survey design, statistical analysis, data visualization
Production & Brand Systems: Layout design, typography, brand identity application, social media graphics, presentation design, wireframing, prototyping, user-centered design
Motion/Animation: Video editing (Premiere Pro, After Effects), motion graphics, animated content for social media
Technical Skills: HTML/CSS, JavaScript, React, Tailwind, Node.js, C, Java, responsive web design
Collaboration/AI Tools: Slack, Jira, Trello, GitHub, Miro, Google Workspace, Google Gemini API (winner of MLH Best Use of Gemini API track), AI-powered design workflows

Experience

Marketing & Outreach Team **August 2024 – Present**
Temple Human-Computer Interaction (HCI) Lab

- Design and manage social media content strategy across Instagram and LinkedIn, creating visually engaging posts that communicate research findings and lab initiatives to diverse audiences; collaborate with cross-functional team of researchers, faculty, and community partners to translate technical concepts into compelling visual content
- Create + apply brand systems and visual identity guidelines across digital platforms, maintaining consistency in typography, spacing, alignment, and design elements
- Design marketing materials for guest speaker events and community outreach programs with local high schools, taking initiative to solve creative challenges and iterate based on feedback

Website Director **September 2024 – Present**
Grey Matters Neuroscience Journal

- Lead complete redesign of digital presence for Temple's chapter of a national neuroscience journal (50,000+ visits), creating polished, thoughtful design that makes scientific content accessible and inviting
- Design layout-heavy web pages, graphics, and promotional materials while maintaining brand consistency across all platforms; collaborate with multi-functional team including writers, editors, and other board members
- Analyze engagement metrics to iterate on design decisions and optimize user experience

Director | Prev. Outreach Team Lead **October 2024 – Present**
OwlHacks

- Design brand materials, presentations, social media graphics, and event collateral for Temple's annual hackathon with now 500+ participants over 3 year period; played key part in event and organizational growth
- Take established brand systems and translate them into polished design across digital and print formats including social posts, presentations, signage, and sponsor materials
- Collaborate in brainstorms and strategy sessions, contributing ideas from concept to final output and iterating based on feedback; Manage team of 40+ members across design, marketing, logistics, operations, and sponsorship

Writing Tutor **April 2025 – Present**
Student Success Center

- Provide structured, detailed feedback on written and visual communication across technical and non-technical disciplines; Translate observations into clear guidance, demonstrating strong communication skills

Data Analyst Intern **December 2023 - August 2024**
Center for Biodiversity

- Designed publication-ready figures, infographics, and data visualizations using Adobe Illustrator and InDesign
- Applied design principles to create visual content for peer-reviewed research papers and public-facing interactive dashboards (caribherp.org)

Projects

SpiderBusters [Track Winner] **Technica 2025**
MLH - Best Use of Gemini API Track

- Led end-to-end UX/UI design and feature prioritization for educational game interface using Figma and Tailwind CSS
- Designed user flows, wireframes, and high-fidelity interactive prototypes demonstrating full creative process from concept to implementation
- Applied AI tools (Google Gemini API) to power creative solutions and enhance user experience
- Created cohesive visual design system with consistent typography, color palette, and component library
- Collaborated with 4-person team in hackathon environment, iterating rapidly based on user testing feedback

Transiterra **Spring 2025**
UX Design course project

- Led comprehensive user research including semi-structured interviews and surveys across 29+ respondents
- Designed complete mobile app experience from research to final interactive prototype in Figma
- Produced core design artifacts including user personas, journey maps, site maps, user flows, wireframes, and high-fidelity mockups; demonstrated detail through attention to visual hierarchy, spacing, alignment, and typography
- Iterated on designs based on usability testing feedback, showing ability to take feedback and improve work
- Created polished portfolio piece showcasing full design thinking process and problem-solving approach

Coffee Map **Spring 2025**
Software Design Course Final Project

- Leading front-end design and development of consumer-facing web application with interactive map interface
- Design responsive layouts and user interface components using React, JavaScript, HTML/CSS
- Collaborate in Agile environment with regular sprints and design critiques, demonstrating ability to work in fast-paced team setting; Balance aesthetic design decisions with technical constraints and user needs

Awards & Extracurriculars

Hackathons: Technica 2025 (Winner: Best Use of Gemini API), Technica 2024, OwlHacks '24-'26 (Organizer & Director)
Organizations: Rewriting the Code, ACM, ACM-W, Temple Data Science Community, Temple Thaalam Dance Team (Captain)
Grants: CARAS Grant, Frances Velay Research Fellowship, College of Science & Technology Research Program Scholar
